VOLODYMYR   KYRYCHENKO

SOFTWARE ENGINEER

SUMMARY:

I have been working as a Front-End engineer in the IT industry for over 3 years. My first step in this field was the successful completion of the EPAM pre-production program that lasted for 6 months. After this period I received an offer and worked there for one plus year. During the working period I participated in four big projects where I successfully applied modern JavaScript conceptions.

INFO:

LOCATIONS:

- Ukraine, Kiev

LANGUAGES:

- English(upper-intermediate)
- Ukrainian(native)
- Russian(fluent)

EDUCATION:

KNMU Ukraine, Kharkiv, 2014-2020
Professional qualification: Physician

SKILLS:

Programming Languages/Technologies:
- Solid knowledge:HTML,CSS3, JavaScript(ES 5, 6, 7)
- React
- TypeScript
- CSS Preprocessors:LESS, Sass
- Libraries: jQuery, lodash, Bootstrap, Material UI, Styled Components,Redux,Redux-Saga, Redux-toolkit
- NextJS
- Task runners: Webpack, Vite, Gulp
- React Testing Library
- web-socket

Developer Tools:
- WebStorm
- VSCode
- Postman
- Chrome Dev Tools
- Photoshop
- Figma
- Git(GitHub, GitLub, Bitbucket)

Methodologies:
- Agile, Scrum

Operating Systems:
- Mac OS X
- Microsoft Windows XP/7 -11
- Ubuntu

EXPERIENCE:

Frontend Developer
(OCT 2021 - Present time)

I've done 3 projects, implemented from scratch & supported an insource project.

With respect to the requirements and objectives to be achieved, React.js was considered as the most appropriate front-end JavaScript library for this project development. However, forms in React are rather verbose; that is why we additionally used Formik, which is a simple and easy to use form library. Working on data tables, we applied React Table that enabled us to create a powerful datagrid experience, having total control over markups and styles.

Projects: NDA
Role: Front End developer
Tools & Technologies: *Typescript, React, Redux, Redux-Saga,, Formik, Ramda, React-Testing-Library, Jest, MaterialUI, Styled-Components*

Responsibility:
- solving technical problems
- developing reusable UI components
- integrating UI components
- performing unit-testing of JS code
- task estimation

Frontend Developer
(JUL 2020 - AUG 2021)
I've done 2 projects, implemented from scratch.

Food order aggregator web app.
Developed a food search, registration, and authorization, and added a user profile edit page.

Clearance Copyright Center

Application that helps users to sell their articles, search for already written articles, view articles' statistics.

Projects: NDA
Role: Front End developer
Tools & Technologies: *React, Redux, Redux-Saga, MaterialUI, Styled-Components*

Responsibility:
- Developing responsive web layouts
- Implementing client side logic

- Performing components integration with the back-end
- Fixing UI bugs

Frontend Developer
(FEB 2020 - MAY 2020)

Role: Front End developer
Tools & Technologies: *Vanilla JS, React, Material UI*
